

Children's event at Upper Overton Farm, Bridgnorth, June 7th

By popular demand, last year's event for children was repeated this year, although the weather was rather less kind, leading to wet and muddy conditions.

Hannah aged six wrote: "The orienteering was very fun. It was wet, but it was still exciting. Lots of people went on the white course. It was tiring but I did the course four times. My fastest time was with Lauren and Zara."

James aged nine said: "The day was action-packed with courses to go on and after you'd gone round you could always go back and play in the woods. My Yellow course was slippery, muddy and long. Control 11 was tricky to find because it looked like it was in a bush on the map but actually it was on the path. I did the fastest on this course because I ran it all and I found all the controls quickly."

Several people did the course more than once. Only their first time should count, but I've put them all in the list anyway.
