

Planners's comments. Hartlebury WEE

It was lucky that it stopped raining before the first runners started though the excessive vegetation was still very wet. Sorry not to have got the map updated but with other commitments I didn't start the planning process early enough to let the mapper know how dated the map was. I decided that to give map corrections would have cluttered the map too much. Control 1 in particular was badly affected by vegetation. I hope this didn't spoil anybody's run. Great competition at the top of the table, with two complete clearances with only seconds between them.
